ABOUT

I'm a self-taught full-stack software developer with 1+ years of web development. I'm proficient in JavaScript, React, and TypeScript, and have worked with Node, Express, and Redux. I have a passion for learning new technologies and approaches, and I'm highly adaptable to meeting tight deadlines. Collaboration and problem-solving are aspects of web development that I enjoy. I like to experiment with new technologies and build personal projects to further expand my knowledge and skills in web development.

PROFESSIONAL BACKGROUND

Fullstack Developer, Jun 2021 - Present:

- Developing accessible, cross-browser-compatible landing pages and multi-page websites using pure JavaScript and frameworks while adhering to SEO and accessibility best practices.
- Writing SQL queries for database management.
- Developing server-side application code and handling API requests.
- Solving algorithmic problems to optimize website performance.
- Developing pixel-perfect design implementations.

See some of my projects at:

- **E-Commerce website Nice Gadgets (React, TypeScript, Postgres)**

Description: website for selling devices is an online platform where customers can browse and purchase electronic devices such as smartphones, laptops, tablets, and other gadgets

Demo <https://fe-nov22-shd.github.io/catalog-view/>

GitHub <https://github.com/fe-nov22-shd/catalog-view>

- **E-Commerce website (JavaScript, HTML, CSS)**

Description: Christmas decoration shop. There is a basket for products and various sliders.

Demo <https://nvyrsta.github.io/christmas-decor/>

GitHub <https://github.com/NVyrsta/christmas-decor>

- **Landing page Bose (JavaScript, HTML, CSS)**

Description: the landing page has a responsive design

Demo <https://nvyrsta.github.io/bose/>

GitHub <https://github.com/NVyrsta/bose>

- **Landing page Britlex (JavaScript, HTML, CSS)**

Description: the landing page has a responsive design, and there is a form where you can subscribe to the mailing list

Demo <https://nvyrsta.github.io/britlex/>

GitHub <https://github.com/NVyrsta/britlex>

Manager of work with key customers

in household chemicals distribution company 'BHB Group':

- communication with customers, working with a massive number of orders
- solving logistical issues

Being in this position, I managed to increase the productivity of our department by optimizing work processes. For example, at the beginning of my career, I managed to process 100 customer orders per day by manual entry, now it is possible to process 20,000 orders per month, which is not the limit. The company still uses most of my ideas in its work. This experience inspired me to start a career in programming to improve business, not waste time on unnecessary routines, and focus on quality. I am always looking for ways to optimize and improve work processes, to automate them.

ADDITIONAL EDUCATION

- Fullstack course at Mate academy (Git, HTML, CSS, JavaScript, Typescript, Node, React, Redux, Web)
- **Udemy:**
 - The Complete JavaScript Course 2022: From Zero to Expert!
 - SQL - The Complete Developer's Guide (MySQL, PostgreSQL)
